

VIROLOGY TESTING

CompuNet Clinical Laboratories

(937) 297-8338

Place swabs in viral transport medium (VTM), available from CompuNet.

Keep all VTM specimens refrigerated and state the source of specimen

Test Name	Order Code	Description	Turnaround Time
Viral Culture (VTM)*	689	Covers common viruses - includes HSV, VZV, CMV, and all respiratory viruses, including Metapneumovirus	48 hours, maximum 5 days
Respiratory Screen by DFA (Direct Fluorescent Assay) (VTM)*	74108	Influenza A & B, parainfluenza viruses, RSV, adenovirus, and Metapneumovirus.	DFA is same day if received in AM, otherwise next day (before 12 noon)
Viral DFA (Direct Fluorescent Assay) (VTM)*	73547	Must specify virus (HSV, VZV, RSV, Influenza A, Influenza B, parainfluenza viruses, adenovirus, Metapneumovirus, etc.)	Test performed 7 days/wk. Same day result if specimen is received in AM. Otherwise, next day (before 12 noon)
Viral DFA (Must specify) with reflex to culture	73904	Must specify virus (HSV, VZV, RSV, Influenza A, Influenza B, parainfluenza viruses, adenovirus, Metapneumovirus, etc.)	DFA is same day or next day. Viral culture final 48 hours, maximum 5 days
Influenza A DFA (VTM)*	73472	Specific for Influenza A only	Same as viral DFA (73547)
Influenza A DFA, reflex to viral culture (VTM)*	73901	Influenza A DFA, with reflex to viral culture, if negative	DFA is same day or next day - viral culture final 48 hours, max 5 days
Influenza B DFA (VTM)*	73706	Influenza B DFA only	Same as Viral DFA (73547)
Influenza B DFA, reflex to viral culture (VTM)*	73902	Influenza B DFA with reflex to viral culture, if negative	DFA is same day or next day - viral culture is final at 48 hours
Respiratory Syncytial Virus (RSV) by DFA (VTM)*	8467	Specific for RSV Only	Same as Viral DFA
RSV DFA reflex to viral culture (VTM)*	73903	RSV DFA with reflex to viral culture, if negative	DFA is same day or next day - viral culture final 48 hours, max 5 days
Chlamydia Culture (VTM)*	690	To be used for specimens other than genital or urines; also to be used for all specimens on patients under the age of 12 years	Final report in 48 hours
Cytomegalovirus (CMV) Culture	71097	Specific for CMV only	Report at 48 hours
Herpes Culture (VTM)*	665	Specific for Herpes virus only	24 hour 7 days/wk

Please note: If looking for Enterovirus, results may require 5 days.
Keep all VTM specimens refrigerated
